

Eid Mohammad Ahmadi

Python Backend Engineer · Django · DRF · FastAPI · PostgreSQL

Barcelona, Spain empouya03@gmail.com +34 604 285 641 empouya.github.io github.com/empouya linkedin.com/in/empouya

SUMMARY

Backend Engineer delivering paid software since 2022, focused on **Python, Django / DRF, FastAPI, PostgreSQL**, testing, and Docker/Linux deployment. Led backend delivery and ongoing maintenance for a logistics platform used across six countries, covering bug fixes, incremental features, security, performance improvements, and production operations. Additional paid experience building and delivering FastAPI-based API integrations.

TECHNICAL SKILLS

BACKEND	Python, Django / DRF, FastAPI, REST APIs
DATABASES & PROCESSING	PostgreSQL, Redis, ETL, Excel/CSV processing
TESTING & SECURITY	Pytest, Unit testing, Integration testing, End-to-end testing, JWT, RBAC
INFRASTRUCTURE	Docker, Linux, Nginx, HTTPS, Alibaba Cloud ECS, Git, GitHub Actions, AWS
SUPPORTING	Celery, TypeScript, React, Next.js

EXPERIENCE

Technical Lead / Backend Engineer — Confidential International Logistics Client Jun 2023 – May 2025

Led backend delivery for a seven-developer logistics platform used across six countries, coordinating technical work with backend teammates and the frontend lead.

Designed and developed the **Django / PostgreSQL** backend for container tracking, customer accounts, invoicing, balances, branch operations, and multi-currency financial records.

Implemented **JWT**, four role-based access models, branch-confirmed shipment workflows, and an administrative audit dashboard.

Deployed and maintained the production stack on **Alibaba Cloud ECS** using Docker, Linux, Nginx, HTTPS/Certbot, PostgreSQL, and daily/on-demand backups.

Maintained the platform through May 2025, resolving defects, improving latency and memory usage, expanding automated tests, and delivering incremental cross-branch features.

Backend Developer Intern — Amirkabir University of Technology Sep 2023 – Nov 2024

Built **Django** backend APIs in a four-developer team, supported React integration, integrated the university's central authentication gateway, and added **Pytest** unit and integration coverage.

Developed recurring **Excel / CSV data pipelines** for cleaning and migrating legacy records and helped deploy the application in Docker on university infrastructure.

Supervisor: Nawid Farahmand · nawid.farahmand@aut.ac.ir

Backend / AI Integration Developer — Confidential English-Learning Client 2024

Built a **FastAPI** backend accepting streamed audio and returning structured pronunciation results; validated behaviour against client audio data and delivered source code, API documentation, and integration materials.

SELECTED PROJECTS

TaskHive — Team & Project Management Platform

Django · DRF · PostgreSQL · React · TypeScript · Redis · Celery · Docker · Pytest

Independent team-scoped project-management platform with RBAC, invitations, tasks, comments, and notifications. **100+ backend tests** and **90%+ backend coverage**; Dockerized and operational locally.

EDUCATION

B.Sc. Computer Engineering

Amirkabir University of Technology (Tehran Polytechnic) · 2025
